

ABSTRACT OF THE DISCLOSURE

A portable terminal can provide stereo sound. The portable terminal includes:
5 a phone body having a plurality of keys and a microphone, which are disposed on an
upper surface of the phone body; a folder having a main speaker and a main LCD, which
are disposed on a lower surface of the folder; a hinge unit including a pair of side hinge
arms and a center hinge arm, which enable the folder to be rotated away from or
towards the phone body, the side hinge arms being opposed to each other at one side of
10 the phone body, the center hinge arm being disposed between the side hinge arms; a pair
of side speakers provided at the side hinge arms, respectively, the side speakers being
oriented in opposite directions along a hinge axis of the portable terminal, so that the side
speakers produce sound in opposite directions along the hinge axis; and speaker covers
arranged along the hinge axis to cover the side speakers, respectively, each of the speaker
15 covers having at least one opening through which one of the side speakers is exposed,
wherein each of the speaker covers is fixed to one of the side hinge arms by a first screw
and a second screw, so as to cover an outer surface of said one of the side hinge arms, the
first screw being screwed in a direction parallel to the hinge axis, the second screw being
screwed into said one of the side hinge arms from an upper end of the hinge body in a
20 direction perpendicular to the hinge axis.
